## WELCOME LETTER

Best regards from Banská Bystrica, the Summer EYOF 2022 host city. First of all, allow me to express my sincere thanks for the opportunity to organize the European Youth Olympic Festival in Slovakia. Our goal is to prepare an event that will not only increase the visibility of the City of Banská Bystrica, but also our country and show that even a small state in Europe can organize a large international event. I believe that EYOF will also help the development of sports and its popularization among young people in Slovakia.

EYOF 2022 will be proof that multi-sport events can move from large agglomerations to smaller cities and regions. We are trying to show that it is possible to organize a big sports celebration with international participation even with a limited budget and to serve as benchmark for future organizers.

In addition to expanding and modernizing the sports infrastructure, the event will bring further added value. Banská Bystrica will not only become more visible on the sports map of Europe, but thanks to international visitors it will also bring economic benefits. EYOF has more than an urban character and will be a celebration of sports throughout our region. It will help to promote and support healthy lifestyle, develop sports and improve the quality of life of children, young people and adults.

The heart of the entire EYOF will be the Sport Park EYOF, set up in the Štiavničky complex. The indoor swimming pool, the athletic stadium, as well as the ice rink gradually underwent modernization. The sports infrastructure has been given a new dress and will continue to serve our residents, who will feel more comfortable on the renovated sports grounds, after the event.

Life is slowly returning to normal after the two-year Covid pandemic. EYOF 2022 is the first major event that will be hosted by our city. Banská Bystrica residents are very proud of the opportunity to welcome the whole Europe in the middle of Slovakia. We do not have much time left to prepare for the European Youth Olympic Festival 2022. I am convinced that the Organizing Committee as well as the inhabitants of Banská Bystrica will be able to create ideal conditions for 3,600 athletes and officials from 50 countries. And thanks to a multi-sport event, we will bring together young European talents that will help to highlight the values of sport and physical activity for the health of society as a whole.

Yours sincerely

Ján Nosko

Mayor of Banská Bystrica and President of the EYOF 2022 Organising Committee

Each NOC must contact their 'own' National Federation to make the arrangements for their referees.

## 21. SUSTAINABILITY

### Introduction to Sustainability

*"Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs."*

(Brundtland, G.H. et al. 1987, Our common Future)

## Sustainable, green EYOF Banská Bystrica 2022

The organization and realization of such a big international event with such a high number of participants brings along, in

addition to a number of organizational challenges, also a huge impact on the environment. It is for this reason that we make every effort to reduce and minimize the impact on the environment and initiate the project "Sustainable, green EYOF BB 2022". We sensitively perceive the global climate change, environmental pollution, the accumulation of plastics, the loss of biodiversity, etc and we don't want to ignore it. On the contrary, with effective and sustainable tools we want to reduce these negative phenomena and through educational activities raise the awareness of the importance of finding sustainable solutions at all levels - not only socially (sports, cultural and organizational), but mostly individually (change of personal preferences and settings, change of individual mindset). In addition to well-prepared sports venues and experience from great sports performances, we aspire to make this event in the heart of Europe as responsible and sustainable as possible.

Therefore, the Organising Committee believes that thanks to the precise, innovative and sustainable event execution could also this event serve as a model not only for young athletes but also for the general public in raising awareness and spreading the word about sustainability, encouraging people to make responsible decisions and find new ways of behaving. We feel that it is our "duty" to organize such a large event in as much as possible sustainable way and so to contribute to a more sustainable development of our planet at all.

**Education (infographics / communication):** The sustainable program will be accompanied by creative educational and awareness-raising campaign, infographics. But for sure, we will need ATHLETES' active participation and support in all mentioned areas.

It is important to us that athletes, delegates, fans and the public perceive the social responsibility that each of us has towards the environment. In order to change their habits in a non-violent and natural way and to gain new knowledge in the future from the area of "green" topics, which will become permanent and ubiquitous for everyone.
