Accreditation functionality is part of PASSPORT with which NOCs will register their NOC members on the Long List. For successful DRP NOCs will complete their Sport Entries for athletes and finalize their NOC Delegation Short List by Name. Unless the NOC has completed the DRP, members of NOC Team Delegations will not be accredited, and therefore not entitled to participate in the EYOF 2025.

## 7 Antidoping & TUE

### 7.1 Doping Control Rules and Program

The EOC has delegated the independent management of the anti-doping program to the International Testing Agency (ITA). The anti-doping program ensures the right of athletes to fair and clean competition, and since at EYOF many young athletes have their first experience with doping control procedures, it will be carefully planned and implemented. Doping control and anti-doping education will be part of EYOF 2025, and please read more about at <https://www.eurolympic.org/clean-sport/introduction-to-anti-doping/>.

### 7.2 Medication Use and TUE

All Athletes and Athlete Support Staff must be familiar with the Prohibited Substances and Methods (List), which is valid from 1 January 2025. If an Athlete has diseases or conditions that require the use of medications that are prohibited, the Therapeutic Use Exemption (TUE) may grant him or her permission to take the required medication. Athletes and their support staff must be aware of the EOC TUE recognition process and the TUE application process (<https://www.eurolympic.org/clean-sport/therapeutic-use-exemption-process/>).

In particular, the ITA ITUEC (TUE Committee) will automatically recognize TUEs previously granted by your National Anti-Doping Organization (NADO) and IFs for purposes of the EYOF 2025 without the need to review the relevant clinical information. If the TUE is correctly entered in the Anti-Doping Administration and Management System (ADAMS), there is no need to contact the committee. Nevertheless, should an athlete require confirmation, NOC can submit the request to the ITA at [tue@ita.sport](mailto:tue@ita.sport) in writing quoting athlete's ADAMS TUE reference number. All TUEs need to be submitted and approved by NADO by 8 February

2025, and from 9 February ITA will manage the TUE program with the support of over 20 medical experts forming the ITA International TUE Committee (<https://ita.sport/ituec/>). Please note that for substances prohibited in-competition only, you should apply for a TUE at least 30 days before EYOF 2025, unless one of the exceptions on retroactive TUEs apply.

At all times, athletes are strongly advised to check the status of the medications they are using or considering using with their team doctors. If, during the EYOF 2025, further clarification is required, the athlete should check with the NOC Medical Officer(s).

### **7.3 Whereabouts**

An effective Out-of-Competition testing program is essential in the fight against doping in sport and depends on accurate and complete Athlete Whereabouts information.

Within EYOF such activity has more educational value and since the majority of athletes are not part of ADAMS, OC will give ITA the allotment locations of all NOCs from the date of arrival to the date of departure once allotment process is finished.

### **7.4 Doping Control Stations**

Doping Control Stations (DCS) in Bakuriani will be located in the AVL1, Crystal Hotel. All doping control samples will be conducted in separate processing rooms providing the required privacy and confidentiality for athletes and security for the doping control procedures. DCS will comply with all provisions set out in the EOC Anti-Doping rules and the World Anti-Doping Code.

### **7.5 Doping control procedure**

The ITA will plan and implement all doping control procedures according to the EOC Anti-Doping rules, the World Anti-Doping Code and the International Standard for Testing and Investigations (ISTI).

The doping controls will be carried out with no advance notice. Upon notification of doping control, the athlete will be required to present himself/herself immediately at the DCS, unless the Doping Control Officer (DCO) gives the athlete permission to postpone the doping control for the reasons set out in the ISTI. More information will be available in the Anti-Doping Manual at a later date.

### **7.6 Collection of Samples**

Collected samples will be analyzed in an accredited laboratory of the World Anti-Doping Agency in the Institute of Biochemistry - German Sport University Cologne, Germany.

Responsibility for sample collection has been delegated to the Georgian Anti-Doping Agency (GADA). According to the EOC Anti-Doping Rules and the International Standard for Testing and Investigation (ISTI) athletes may undergo doping control at any time and in any place during the entire period of the EYOF 2025. Urine and blood tests are possible, so athletes must be familiar with both doping test procedures and their rights and responsibilities during doping control testing. Minor athletes should be notified in the presence of an Athlete Representative (who is not minor) in addition to the DCO/chaperone and may choose to be accompanied and observed by a representative throughout the Sample Collection Session.

Bottled water and soft drinks will be available for athletes at the DCS, but no food. The athletes' representative or support staff member can bring food for the athletes if needed. After compilation of the doping control session, athletes and representatives will be provided with transportation to accommodation from the doping control location.

## 7.7 Anti-Doping Education Program

The ITA and GADA will deliver onsite clean sport training workshops during EYOF 2025. All athletes and athlete support personnel are encouraged to participate in educational activities.

## 7.8 Reveal

Athletes and Athlete Support Personnel play a key role in protecting the integrity of sport. Any reasonable grounds for suspecting doping can be reported through [REVEAL](#), the ITA whistleblowing platform.

REVEAL enables anonymous reporting in a secure manner while actively supporting the investigation of Anti-Doping Rule Violations or criminal behavior. All information is treated confidentially and in a sensible manner. You can report anything that you have seen, heard or experienced and every piece of information is important – no matter how small!

# 8 Media & Mixed zone

EYOF Bakuriani 2025, in collaboration with the EOC and the NOC of Georgia is prioritizing the safety of all participants, regarding which Safeguarding procedures are crucial to maintain a secure and protected sports environment. ## 10.5 WhatsApp group

OC has opened WhatsApp (WA) group, which will operate during EYOF 2025, and Team Captains/Leaders will get all the information and updates from the WA group. This will be during EYOF 2025 one-way official communication from EYOF 2025 OC side, and we ask Team Officials to register with the group to receive the latest information.

## 10.6 Radio frequency registration and assignment

VHF or UHF radio frequencies are licensed and coordinated by the Communication Commission of Georgia. However, not every two-way radio has to be licensed; some can operate on specific, license-free (PMR446) frequencies.

### License-free (PMR446) frequencies:

- PMR stands for Personal Mobile Radio.
- License-free radios are generally lower-powered, handheld radios with a maximum power output of 0.5 watts.
- PMR446 frequencies are only allowed to be used by lower-powered, shorter-range license-free radios. It's highly illegal to program a higher-performing business radio to these frequencies – these are supposed to operate under a Communication Commission license.

### Licensed professional frequencies:

We recommend NOCs to use license-free frequencies, but if teams want to use professional, higher power radios, NOC can fill [FREQUENCY REQUEST FORM](#) and send it to mail at [post@comcom.ge](mailto:post@comcom.ge) by 6 December 2024. Please click [more](#) about prices and rules.
